MEMORANDUM FOR THE RECORD

SUBJECT: Senate Select Committee Contact - William G. Miller

1. Bill Miller called this morning to say that he will soon be sending me a draft letter which will lay out the SSC Staff's suggestions for the topics to be covered in their examination of covert activities back through history. The hope is that presentations on these subjects can be made to the full Committee beginning in a week or two.
2. This was a follow-up to earlier conversations with me last week in which he asked for our ideas on the best sample topics for the Committee's explorations into covert activities, to include clandestine collection as well as covert political actions.
3. It was agreed that in responding to the draft that we will have a chance to provide our suggestions.
4. Miller said he assumed and hoped that we were also at work preparing what he called "basic analytical statistics" concerning covert activities running back to 1947. What they are looking for as a back-drop to their examinations are some statistics indicating the extent of use of covert activities, the amount of money we have put into them over the years, and a geographical break-down to show the areas where these investments and activities have occurred.
